

## Publish Data to IBM Cloud

Team ID	PNT2022TMID01873
Project Name	Smart waste management system for metropolitan cities

Step 1: In the python script give the IBM credentials like org id, device type, etc. to connect to IBM cloud

Step2: Open your cloud account and open Watson platform

Step 3: In the specified Device Type mentioned in python script shows connected

Step 4: Then click on Recent Events and observe the Output data

## Screenshot:

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar shows the platform name and user information. The left sidebar contains a menu with icons for various functions. The main content area is titled 'Device Drilldown - BIN1ID' and features a sidebar with navigation options: Connection Information, Recent Events (selected), State, Device Information, Groups (beta), Metadata, Diagnostics, Connection Logs, and Device Actions. The 'Recent Events' section shows a table of recent data points. The 'State' section shows a table of data points. The 'Device Information' section is at the bottom.

**Recent Events**

Event	Value	Format	Last Received
IoTSensor	{"dist":47,"load":12}	json	a few seconds ago
IoTSensor	{"type":"Buffer","data":[34,97,108,101,114,116,...]}	json	a few seconds ago

**State**

This table shows a list of data points that are reported by this device.

Showing Raw Data | No Interfaces Available

Property	Value	Type	Event	Last Received
dist	47	Number	IoTSensor	a few seconds ago
load	12	Number	IoTSensor	a few seconds ago

**Device Information**
